- ✓ **safe**

### Proven effects:

#### Against Coronaviruses (COVID 19 tested)

- Virus reduction after 1h 90%
- Virus reduction after 8h 99,9%

#### Against Escherichia coli bacteria:

- Germ reduction after 0,5h 99,62%
- Germ reduction after 1h 99,95%

The long-term coating against viruses and bacteria

# The long-term coating against viruses and bacteria

Protect yourself, your clients and your environment! Airdal eliminates pathogenic germs like viruses and bacteria without damaging the underlying surface. It forms an ultrathin protective layer, which seals the surface and eliminates pathogens for at least 12 months.

## Simply apply the permanent protection in 2 easy steps:

- 1. Step:**  
Clean the non-absorbent surface with the Cleaner Wet Wipe.
- 2. Step:**  
Polish the surface with the Coating Wet Wipe and leave Airdal at least six hours to act.

### Areas of application:

- Surfaces consisting of plastics, glass, metal, ceramics, stone or wood
- Bathroom and kitchen appliances
- Articles of daily use like mobile phones or laptops
- vehicle fittings
- construction materials
- retail business
- public areas
- sports facilities
- gastronomy
- public transportation
- sanitary facilities
